

# BOMBARDMENT

## The Ultimate Catapult Game Instructions

The 2 Player MINIBAG launching TABLETOP game

**OBJECTIVE:** Topple your opponent's flag for the WIN.

### EQUIPMENT:

Player 1	Player 2
1 Catapult	1 Catapult
1 Flag	1 Flag
11 Construction Pieces	11 Construction Pieces
4 Mini Bags	4 Mini Bags

#### The Complete Bombardment Game Set Includes:

A - Platform (2)	D - Flag (2)	G - Screw (2)	Catapult (2)
B - Upright Pillar (16)	E - Mini Bag (8)		
C - Buttress (4)	F - Rod (2)		

### RULES:

1. Players sit at opposite ends of a table. Each player assembles the Catapult (see instructions) then constructs a **Fort** to protect their flag (D). Forts are built on the Player's right hand side. The Catapult launch point must be in line with Player's fort. (fig 1)

**Fort** (fig 2) Consists of a platform (A) on top of at least two pillars in upright position (B). Flag must be placed above the Platform. Flags can be surrounded with as many blocks as desired; but the entire Flag pennant must be visible to opponent.

2. **Topple** your opponent's Flag for the win (fig 3). If both Flags remain in play after the first **round**, all mini bags must be **extracted**. Replay rounds until the game is determined alternating Player One position each round.

**Round** Players alternate mini bag launches (one player at a time) until a Flag is toppled. If Player One topples Player Two's Flag, Player Two has one opportunity to tie (if they have a mini bag left).

**Extraction** Player must remove opponent's mini bag(s) from Player's own fort at the end of each round. All mini bags must be extracted without toppling the flag or otherwise damaging the fort. A flag toppled by accident is an automatic loss. However, player may choose to leave an entrenched mini bag in their fort, but then must forfeit one of their own mini bags to opponent for remainder of the game.

**Toppled** A Flag completely on its side. A leaning Flag is not a toppled Flag.

Leaning flags and flags supported by a damaged fort are in play as long as the fort is still standing and the pennant is not touching the platform (fig 4). A flag that has fallen off the fort and onto the tabletop is out of play (even if it is still standing somehow).
